Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 June 2003.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 1-10 recited the limitation “the position indicator for performing graphic input for such OA equipment by moving the indicator into the air” Although the specification does mention a method for performing graphic for such OA as computer and game machine (page 4, lines 12-14). The specification is not enabling as to how one of ordinary skill in the art would actually coupling the position indicator to the computer, how the position indicator can generate graphic input, and how the data is input to the computer system. Specially, how one of ordinary skill in the art can perform graphic input by moving the position indicator in the air if the holes are cover by the user’s palm.

3. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1-10 recited the limitation “the position indicator for performing graphic input for such OA equipment by moving the indicator into the air”. Although

Art Unit: 2674

the specification does mention a method for performing graphic for such OA as computer and game machine (page 4, lines 12-14). There is no support for that limitation “the position indicator for performing graphic input for such OA equipment by moving the indicator into the air”, and how a user can perform graphic input by moving the position indicator in the air if the holes are cover by the user’s palm.

Response to Arguments.

4. Applicant’s arguments, see page 2-4 of the amendment, filed June 7th, 2003, with respect to Claims 1-10 under the 112 first paragraph rejection have been fully considered but are not persuasive. Applicant argues “the principle object of the present invention is to clarify how to detect the movement data of a pointing device... (page 2, line 14 – page 3, line 2) and the present invention is based on the assumption that the user holds the tool by his fingers so that he does not cover ay hole when using it (page 4, lines 5-10) ”. It is noted that the features upon which applicant relies (i.e., the principle object of the present invention is to clarify how to detect the movement data of a pointing device...) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2674

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
